## DENTAL LAB

### CROWNS & BRIDGES

Our crowns and bridges are made with the finest material available today from internationally-known manufacturers. Our metal substructures are made with accredited alloys and each case includes an dental alloy certificate for the patient record.

#### All Ceramic Crowns & Bridges

##### ZIRCONIA SOLID

Zirconia has a comparable flexural strength of traditional PFM restorations while maintaining a natural and vibrant translucency. Zirconia Solid is 100% metal-free, a feature that prevents gingival darkening and removes the possibility of exposing metallic margins if gum recession begins.

##### ZIRCONIA MULTILAYERED ZIRCONIA SCREW RETAINED CROWN / BRIDGE ZIRCONIA LAYERED ZIRCONIA CEMENT RETAINED CROWN

Zirconia Layered is 100% metal-free a feature that prevents gingival darkening and removes the possibility of exposing metallic margins if gum recession begins. Zirconia Layered has beautiful, natural looking esthetics, and are extremely strong for multi-unit bridges. By layering porcelain of the facials and buccal only even long span bridges can look amazing

#### Features

High flexural strength  
Highly biocompatible  
CAD/CAM milled for precise marginal fit  
Tooth-colored material  
Bond or cement

#### Benefits

Long-term reliability  
Healthy tissue response  
Synthetic ceramics for low wear  
Better shading  
Hypoallergenic

### E MAX VENEER

E Max veneers are designed to give your teeth a natural appearance so that you can feel more confident flashing your smile

E Max veneers are translucent in appearance—a quality which gives them the ability to provide a more natural appearance to your teeth

### SEMI-PRECIOUS NON-PRECIOUS

#### Features

Strong  
Versatile  
Used for over 60 years  
Alloy options include high noble, noble (semi-precious) or non-precious alloy

#### Benefits

Good marginal integrity  
Strength and durability  
Restoration lifespan can 30 years or more with good oral hygiene practices  
Tried and true certified alloys
